Leverage the Power of NMD to Improve Quality of Care

Only NMD makes it possible for you to compare your audit data against similar regional and national mammography practices.

With this powerful resource at your fingertips, you can:

- Advance the battle against breast cancer by analyzing detection and diagnostic results and monitoring false-positive/recall rates
- Improve your interpretation of breast imaging and highlight training needs
- Differentiate your facility, demonstrate your commitment to quality, and gain competitive advantage
- Access critical research data to improve the practice of mammography and enhance quality of patient care

When you join NMD, you are taking a critical step to advance both your mammography practice and your mission to improve patient care.

Strengthen Your Practice Performance

NMD delivers critical measurement tools and important feedback that you simply can’t get anywhere else:

- Comparison of practice processes and outcomes — cancer detection rates, false positive rates, positive predictive values, and more
- Detailed and graphic reports to compare your audits
- One-click upload of mammography audit data with NMD-certified software
- Access to national and regional aggregate data

NMD is your source for objective information to assess practice patterns … target specific areas for improvement … measure progress … and document your quality of service.

NMD is an essential tool that allows you to compare your practice performance and patient outcomes to similar practices across the nation — and to implement successful quality improvement programs.

Simply upload your standard mammography audit data and gain easy access to national and regional benchmarks that are accurate … objective … and consistent.

By joining NMD, you can:

- Leverage the Power of NMD to improve Quality of Care
- Strengthen Your Practice Performance
- Find out how your mammography practice measures up

Launching July 2009!

The NMD represents a valuable tool that will allow breast imagers to track their results in a meaningful, comprehensive way. It also affords the opportunity for us to set benchmarks and improve our performance where needed.

— Carol Lee, M.D., FACR
Chair of Commission on Breast Imaging

Here’s What You Get When You Join NMD

Tools to improve patient care:

- One-click access to national and regional benchmarking
- Semiannual comparative reports and graphic benchmark data
- Easy-to-use, Web solution with interface to NMD-certified BI-RADS® software partners
- Standardized, compatible data elements and definitions

Tools to improve breast cancer research:

- Reports to assess positive predictive values, false-positive rates, etc.
- Analysis of patient and exam details, interpretive skills of radiologists
- Critical data to assess mammography outcomes

NMD represents a valuable tool that will allow breast imagers to track their results in a meaningful, comprehensive way. It also allows the opportunity for us to set benchmarks and improve our performance where needed.
